

“Достоинство предисловия - краткость.
Гурбан postulates (доши?)- тело речь ум.

Типитака(?) Завершает антологию
пророчество - похоже сбывается не один
только смысл.

LEGENDS

Prologue:

Здоровье выгоднее выгод, довольство всех
богатств богаче надежность всех родных
роднее (Пара)нирвана+(Бодхичиттва) closer
to heart as rain hits the home, through крышу,
так страсть проникает в сознание если его
не разить.

Как сквозь надежную крышу дождь НЕ
проникнет в дом. Развитое сознание может
быть и безстрастным...

“

SILENCED SCREAMS, UNKNOWN AREA OF LOUD SCREAMS

Update from Sunday, January 25, 2026 7:21:07 PM.

“...but its transition into violence” Mr. Enock MuyundiWekesa. 2025.

After I , Papaev B. realised that human behaviour generally not that flexible and hating & isolation continues, me decided not to proceed with all the data all alone. I am not gonna sacrifice my only Youth Life without any kind with completely alone to “Science” which, honestly was always far-far-far. My decision is to cut data and use only One Source “Joy from X” by Steven Strogats.

Overview (Intro):

We’re knew, that is System – means Science fully, Finite. Whole Tech Discipline exists, FSM\FSA Petri Nets and broadly – Trees. Tree is born, tree stays....tree is falling. Not mandatory that Tree will generate children Baobab, consider at least two-Position with single-Transition PetriNet. Not necessary that it will be transitioned backwards, neither it will be Loop.

But Life is going on, despite everything, Sun spins without Our Impact. As Earth. Nature itself....oh what Am Talkin about....” just Truth”.

More rude example, FSM plus microcontroller would be arcade Automata, the game lives its own! “Wait, it can be no electricity!” Nowadays (Dec. 2025) it is not a Question: honestly why not Place our Arcade Game Machine Under the Sun and Connect good Accumulator? Such were be.....The Game continues! And it has very broad term than we’re gonna imagine.

The “research” is not about harm anyone, activate scary.....debate about something - “heat the Air” No. It’s about using not.....everyday kaleidoscope on “ordinary things” Hopefully getting new Result. Again, it's not mandatory.

Terms:

1. Data limitation and Source reviews
2. Research approaches and proposals
 - a. Scientific (Pure)
 - b. Combined (with traditions)
 - c. Traditional
 - d. Religious (Buddhism)
 - e. Mass media
 - f. “Elite” media - “Rich” - too hilarious if the human virus always beat em up
 - g. Poor-scope (low level of Life) hahaha we’re living here
 - h. Hybrid - impossible
 - i. Medicine – not so quick!
 - i. Scientific Modern
 - ii. Traditional (Tibetan-Mongolian)
 - iii. Medieval
 - j. Accumulating results
 - k. What about Death? Ending?
 - i. Illnesses
 - ii. The most devastation conflicts
 - iii. Tragedies

- iv. Economic Crises
- v. Last Words of Great People (only 100 rows without Persons)
- vi. War losses vs. Everyday Death-Birth rate
- vii. Criminogen Area
 - 1. Bands
 - 2. Robin-Hoods
 - 3. Pros
 - 4. War criminals
 - 5. Historic figures
 - 6. When they're will outrich Elon Musk And which years old they're gonna be if succeeded?
- viii. Will it “heat” the first J result? //ITS HAPPENING ALL AGAIN AND AGAIN, wdym your are meaning?
- 3. Unknown results – clear as outer space and stars.
- 4. Conclusion

1. Data limitations.

- No fairytale in K.V(K-5 Section) as we're not coloring any illegal behavior.
 - Straight language only. Example: "Life = Life. End of Life = Death.";
 - No unproved "flows" in the broad term. Example: "Do aliens exist? Do afterlife possible?...";
 - Extreme activist movements (Any international prohibited organization at least in two Countries makes it prohibited to be considered as data)
 - Extraordinary Lie (can used for training the complex weight network)
 - Non-Science (as today);
 - Magic is impossible;
 - Reincarnation of human is impossible;
 - Time travel is impossible (can use the Computer Simulation as Historic examples, but never more);
- ...add more till next

2 Research approaches and proposals

The Goal is just “test” the Narration of Rebuild Trust Kenya of DPAK (Kenya) provided by Mr. Enock Muyundi(Wekesa). And “this escalates so quickly”.

Architecture of the “Weight System” is:

Input : text , type string.

Output: Weight (percentage), various metrics.

Engine(Algorithm) :

Train data: Truisms=Postulates

Split data: Do & Don't (improves the quality and Precision Score

Weights: Fuzzy-Logic + Acceptance score (Y = fuzzy-logic meas.;X=ML Score)

Result: Plot + Acceptance Score

The “system” itself is flexible (straight lang, do you remember) so it can be managed and the input data can be either ENRICHED or got Small. It's also could be a embedded solution and play the role of Library.

Next, the input data will be shown.

....

a. Scientific (Pure)

The very Tech-Broad Term. For Strengent my Position, I using Predicate Postulate:

The living-ones are mortal.

Humans belongs to living-ones.

Socrates is human

Socrates Mortal

Mortal is unpredictable

Luck is unpredictable

Illness is unpredictable

Happiness is unpredictable

.....

$U = \text{Mortal} == 0$.

$f(\text{Luck}, \text{Happy}, \text{Ill}, \dots, N) := U$

$F(N; U) = \infty$

Life as x, y .

$\text{Lim}((\infty -> 1)) = 0$

$N -> \int \frac{x}{y} + \text{Lim}(F(N; U)) = 1$

Let pack $N -> \int xy + \int xy + \text{Lim}(F(N; U)) = 1$ as Visual Prolog nondeterm predicate Class

`LifeFounder(if [(X:={[[Life:1],[Death:0]]}) then Y:={[[N->]
xy+
int(xy)+
Lim(F(N;U))=1]}])`

`:= UNION(X,Y):=Z.) goal: main(import LifeFounder) x=1,y=0; LifeFounder(x,y,z?)`

`print([z])`

Next....about Truth & False.

According to BOOLEAN LOGIC..... and 2nd digit system , where is 0 zero is TURNOFF, and 1 TURNON then...

1 = ON = Signal = True

0 = OFF = No= FALSE.

Than .

FiniteElementDurability, which works only in the matlab. It interacts with chemistry. This is the heating of the material. But if you just simplify it to the cellular structure, the cell is an oval. Atomic fission takes place there. The fission of an atom is radioactive decay. Thermodynamics. If we designate the progression of heat as the reproduction of the cell.... then either a healthy cell or an affected cell will appear. 0 or 1.

But there are temperature differences and atmospheric pressure..... and the main ? at the end..... the fragility of any FEA. The coefficient of thermal conductivity is set by a person. And if the core of the nuclear power plant is calculated incorrectly, Chernobyl will come. Question.

So any murders are useless. This means that any violence is useless Any muffled cry Any silence lasts longer than a cry Any cry is finite But the universe is infinite. This means that it is above death

ведь хаббл все еще летит. но миша гончиков
остался в моих клипах. или батор марзаев, но у
него есть Баяр Марзаев Баяр это радость, в каком
то смысле Дарима, Юлия и Данжурова...они
действительно стали символами формулы 1 в
каком то смысле. У меня есть родной брат и
одновременно племянник Баяр Зандеев
Чингисович. Мой отец это родной брат его
бабушки. Оба они живы в данный момент (мой
папа и его бабушка) Баяр зандеев младше чем я.
У миши гончикова есть сын Амар-Жаргал но меня
"зовут" БуринЖаргал. Но это не имя.
Бурин=Абсолютность=БуринХан = абсолютная
Гора Жаргал=Счастье ЧингизХан был Чингиз.

Абсолютное счастье это и есть unpredictable. Но и есть смерть.... Статья сохранена в Microsoft 365 Office online. Microsofty 50+ лет, Билл Гейтс покинул пост гендира.

```
void main(while(1) {import LINQ-VisualPrologIronPythonThe living-ones are mortal. Humans belongs to living-ones. Socrates is human Socrates Mortal Mortal is unpredictable Luck is unpredictable Illness is unpredictable Happiness is unpredictable ..... U=Mortal==0.

f(Luck,Happy,Ill....N) := U F(N;U)=∞ Life as x, y. Lim (∞->1)=0) N-> ∫ xy+ ∫ x y + Lim(F(N;U))=1

Пусть тогда N->∫ xy+∫xy+Lim(F(N;U))=1 предстанет как искомый предикат в Visual Prolog nondeterm...

Class LifeFounder( if [(X:=[[Life:1],[Death:0]])] then Y:={[N->∫ xy+∫xy+Lim(F(N;U))=1]}]:= UNION(X,Y):=Z.) goal: main(import LifeFounder)
x=1,y=0; LifeFounder(x,y,z?) print([z]) , sudo su apt-update upgrade .NET last -y import .ipynb from Google Colab grab grep (The Goal is just “test” the Narration of Rebuild Trust Kenya of DPAK (Kenya) provided by Mr. Enock Muyundi(Wekesa). And “this escalates so quickly”. Architecture of the “Weight System” is: Input : text , type string. Output: Weight (percentage), various metrics. Engine(Algorithm) : Train data: Truisms=Postulates Split data: Do & Don't (improves the quality and Precision Score Weights: Fuzzy-Logic + Acceptance score (Y = fuzzy-logic meas.;X=ML Score) Result: Plot + Acceptance Score The “system” itself is flexible (straight lang, do you remember) so it can be managed and the input data can be either ENRICHED or got Small. It's also could be a embedded solution and play the role of Library. Next, the input data will be shown. ) Class UltimaForever (using namespace std using
```

ironpython....МКЭ, chemicalbase, biology.....using *
LINQ(Love as Aryuna, Saryuna, TexasGirlF1,
FreeGirl Darima, Yulia, Sezhedma...EvangelionAsuka
as 1. Avatar Korra as 0. Death as 0) LifeFounder
(x,y,Z?){ } }

So the New Goal to test some Шредингер theory but sudden about bulbs. All simple.
DNA like bulb at cube room.

If the received voice is POSITIVE = 1 = TURNON – the bulb will on and sight O(N)
time...

If the received voice is NEUTRAL ~1/0 = MIDDLE POSITION – it can either no
electricity OR not enough OR TURNON for 1 second and not that long.

If the received voice or sounds of DESTROY has been received = NEGATIVE =
0!*N = THEN BULB can literally transition to Dark Hole and ...there is no more
cube.

4. Conclusion.

As We're tried in our opinion brave scope – when I am, Papaev B-Zh(J) N. started to write
this “article” Day transitions to Night, it snows, rains, maybe electricity AND-OR Internet
outage. “Nothing New upon the Moon”.

Dearly “Nature Childs” of the Future – nearly or FAR-FAR-FAR Away, please Remember –
no one deserves violence harm, disability or even be dead just because them said right thing
according to your coordinates....as we're gonna pay for not only High Powers but as we're
getting older somedays....sharply saying: “I would never want to live whole my life limited
by small cold steelbox of Big Scary Nightmare” Every Art, Music, Film has ending. But scars
from real battle – remains forever at least for Our Lifetime AND Outlives Many Others. Sad
Fact - Shame remains...but who is going to say that again? Or...goto(Intro).
